

The SeaSense LOUT command is not a brightness slider

DeepSea LED SeaLite, flood optic. Right axis is one lamp; the four-lamp rig delivers 28,120 lm at LOUT 100.

Curve digitised from Appendix C, p.10 of the LED SeaLite Operator's Manual rev. 08/27/18.

Lumens from integrating the measured Appendix D beam — 7,030 lm delivered per lamp, not the 10,000 lm nameplate.
